

RECYCLING

Marina Castillo Olmo

DATA

- We don't recycle at my mother's house, so I decided to propose the idea of recycling to her.
- I told him that I was going to do a class work and I explained what it was going to consist of.

PROCESS

- First, I explained to him that we had to put three trash cubes: one for cans , briks and plastic containers; another for paperboard and paper; and another for glass containers such as bottles or jars. We also had to put one for organic.
- I also put one label in each cubes about what do we have to put.

PHOTOS

In this photos I put the three different containers cubes.

PHOTOS

Here is the organic container cub

RESULTS

After a few days, I checked the plastic and paper containers. We can watch that the containers have the correct things.

PLASTIC

PAPER

THANKS!
